<ul style="list-style-type: none"> An ophthalmologist can directly examine the eyes by using special instruments such as schematic glasses, and dipole, and take a photograph of the fundus with a special camera for fundus examination In health screening centers, only preliminary screening is available, and patients are informed of the need for further examination through retina specialists (or ophthalmologists) for accurate diagnosis. 	<ul style="list-style-type: none"> It takes extra time for examination with mydriasis For health screening centers, accurate diagnosis may be difficult.

General

- 1) VUNO Med® - Fundus AI™ is not a stand-alone diagnostic tool that can make a decision alone; hence requires professional judgement from the user.
- 2) There is a chance of misdiagnosis when a medical decision of diagnosis and treatment is made solely based on this solution.
- 3) The user is held responsible for the VUNO Med® - Fundus AI™ assisted final diagnosis.
